

EVO™ CLAYCUTTER

1 Unit Flow Rate:
10,000 - 13,000 m³/hr

2 Operating Depth:
Full Ocean Depth

3 Supply Pressure:
3000psi
Seawater Driven

4 Weight & Dimensions:
Length:
2500/4500mm
Breadth: 1000mm
Weight: 7,500kgs

marin™

The EVO™ Claycutter can also be used for the following applications:

- Cable/Pipeline Route Preparation
- Iceberg Scour Crossing
- General Seabed Engineering

The EVO™ Claycutter unit is surface supplied, seawater powered clay cutting tool.

Variation of the cutter head allows efficient cutting in varied shear strength of hard clays and consolidated materials <450kPa

The EVO™ Claycutter is utilised predominantly for cable/pipeline route preparation in very hard clays.
